leather culture

**en** | A range of products designed to care for leather furniture which preserve the excellent quality of its leather over time and protect it from accidental stains as well as daily wear & tear. All products are water-based and can be used on leather of any color.

This kit contains::

— **Leather Cleaner 100ml**

Water-based liquid cleaner to remove ordinary dirt from leather. Can be used on any leather type, except suede & nubuck.

**Pre-test & Directions:** Apply Leather Cleaner on a hidden area. If leather darkens after drying or you experience discoloring or you are not satisfied with the result, discontinue use. Vacuum clean the leather with a soft-tipped brush. Shake the bottle well. Apply Leather Cleaner to the sponge. Squeeze repeatedly to assure sufficient absorption. Rub the sponge delicately over the upholstery with light circular movements, without applying too much pressure. Do not rub aggressively! Wipe with a clean cloth. After cleaning, always protect leather with the Leather Protector. Recommended when required or 6-12 times a year at frequent use.

— **Leather Protector 100ml**

Water-based leather protection and maintenance cream. If used regularly, this product will help protect upholstery from wear and oil, water and alcohol based stains. Keeps leather beautiful and soft. Can be used on any leather type, except suede & nubuck.

**Pre-test & Directions:** Apply Leather Protector on a hidden area. If leather darkens after drying or you experience discoloring or you are not satisfied with the result, discontinue use. Unless the leather article is new, clean leather with Leather Cleaner. Wipe with a clean cloth. Shake the bottle well. Apply Leather Protector using the white cloth provided, taking care to cover the entire surface of the leather evenly. Leave to dry naturally after application. For a shinier finish, polish the leather when completely dry using a light coloured soft cloth. Do not rub aggressively! Recommended when required or 2-4 times a year at frequent use.

— **Ink Remover 20ml**

A water-based product to be used on finished leather specifically made to remove recent ink marks or lipstick stains from topcoated leather. Removal becomes increasingly more difficult with time. Not for aniline, suede / nubuck.

**Pre-test & Directions:** Apply some product on a hidden area and try to clean with a soft white cloth. If you see colour transferred to the cloth discontinue use. Try to remove stains as soon as possible. Rub the product directly over the spot, allowing 30 seconds for the ink or lipstick to dissolve. Once the stain starts to dissolve, use a soft white cloth to wipe away both the Ink Remover and stain. For stubborn stains, a further application may be needed. Never rub the leather aggressively. If the stain is not removed with Ink Remover we suggest to discontinue use. Clean the leather with Leather Cleaner to remove all residues and then protect with Leather Protector.
